

Opportunity Title: Office of Technology Transitions Entrepreneurship Program

Opportunity Reference Code: 2021-Internships-OTT-EP

Organization U.S. Department of Energy (DOE)

Reference Code 2021-Internships-OTT-EP

How to Apply Click on *Apply* below to start your application.

Application Deadline 5/10/2021 8:00:00 AM Eastern Time Zone

Description *Have you ever wondered how an idea becomes a technology or product that can be deployed by the private sector?*

“Technology transitions” is the dynamic process, with numerous and varying handoffs between scientists, innovators, and entrepreneurs, that begins with an idea that ultimately becomes a technology commercialized and deployed by the private sector (think of this as taking a technology from the test tube to a product that can be bought). Every technology follows its own unique path and requires a variety of exchanges and partnerships to advance it along the developmental spectrum. OTT provides support in each step of this process.

The U.S. Department of Energy (DOE) Office of Technology Transitions (OTT) is sponsoring a new program for the summer of 2021. The OTT Entrepreneurship Program is designed to develop a pool of talented technology commercialization professionals. The DOE and National Labs can draw from this pool of professionals in an effort to achieve OTT’s mission to expand the public impact of the department’s research and development (R&D) portfolio while advancing the economic, energy and national security interests of the nation.

Why should I apply?

The program will benefit the participants by enhancing their education and training in technology commercialization-related fields and increasing their future marketability in these disciplines. In addition, participants assigned to policy-related projects will gain deep insight into the federal government’s role in the creation and implementation of policies that will affect energy technology development and commercialization.

Program selectees will participate in and contribute to OTT mission related research activities under the guidance of National Lab technology transfer specialists and OTT staff.

Stipend

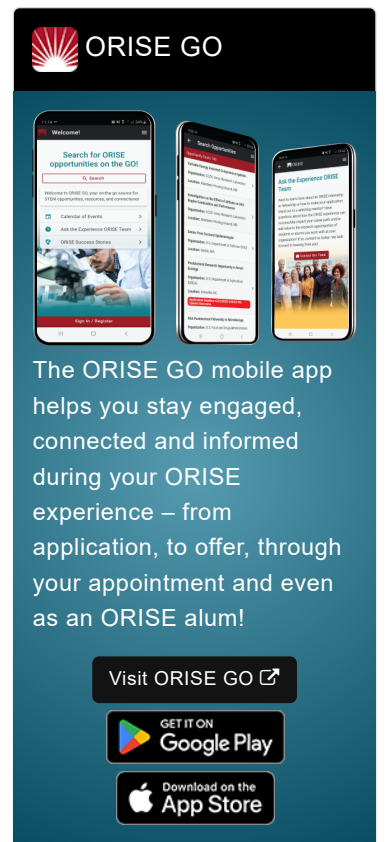

\$700 per week

Duration

Internships will be for 10 consecutive weeks beginning on Monday, June 14, 2021 through Friday, August 20, 2021.

Review and Selection Process

Applications will be considered on a rolling basis until the program cohort is filled. Interested applicants are strongly encouraged to apply as soon as

possible.

Completed applications will undergo an eligibility and compliance check by ORISE.

OTT may conduct interviews with candidates before making final selections. Final selections will be made by a federal official from OTT who will notify ORISE of final selections. ORISE will notify applicants.

Nature of Appointment

The participant will not enter into an employee/employer relationship with ORISE, ORAU, DOE, or any other office or agency. Instead, the participant will be affiliated with ORISE for the administration of the appointment through the ORISE Appointment Letter and Terms of Appointment.

A completed application consists of:

- All required fields in the profile
- Program Specific Questions
 - Goals: Please list your personal, educational, and professional goals and interests and explain how this opportunity may enable you to achieve those. Describe any experiences or situations that you feel have influenced your interest.
 - Experience: Please list any research, technical and/or professional experience that was focused on (1) technology development; (2) technology commercialization; and (3) entrepreneurship.
 - Skills: Please list your professional/technical skills and abilities that are relevant to this opportunity, including knowledge/skills related to specialized laboratory equipment or techniques, computer hardware, software, or computer languages and/or applications.
- Transcripts/Academic Records - Unofficial transcripts or copies of the student academic records printed by the applicant or by academic advisors from internal institutional systems may be submitted. Transcript or academic records must clearly show the student name, name of the academic institution, enrollment during the current academic term, current/completed/enrolled courses, grades, most recent cumulative GPA, and degree in progress. Documents must have all social security numbers, student identification numbers, and/or dates of birth removed (blacked out, blackened out, made illegible, etc.) prior to uploading into the application system.
- A current resume/Curriculum Vitae
- Academic Recommendation - Letter should address your academic record and potential for success in an appointment, such as demonstrated intellectual merit, communication and teamwork skills.

Recommendation must be submitted via Zintellect by Monday, May 10, 2021 8:00:00 AM Eastern Time Zone.

About OTT

The U.S. Department of Energy (DOE) is one of the largest supporters of technology transfer in the federal government. The Office of Technology

Opportunity Title: Office of Technology Transitions Entrepreneurship Program

Opportunity Reference Code: 2021-Internships-OTT-EP

Transitions (OTT) was established in 2015 to oversee and advance this important mission by expanding the public impact of the department's research and development (R&D) portfolio to advance the economic, energy, and environmental interests of the nation. The office develops and implements on the Department's policy and vision for expanding the commercial impact of its research investments, and it streamlines information and access to DOE's National Laboratories (listing available at https://www.labpartnering.org/choosing_a_lab) and sites to foster partnerships that will move innovations from the Labs into the marketplace. OTT hosts the Lab Partnering Service (LPS) Website where one can find information on and access DOE Experts, Innovations, and Labs. This information is located at: <https://www.labpartnering.org>.

The Chief Commercialization Officer serves as Director of the Office of Technology Transitions, whose responsibilities include oversight of the [Technology Commercialization Fund](#) (TCF), Technology Transfer Working Group, and the coordination of technology transfer activities and best practices across the DOE complex.

OTT's responsibility extends throughout the Department's programs, 17 National Laboratories, and other research and production facilities located throughout the country. The office works closely with stakeholders and personnel at all these locations to ensure the development of the best policies and to maintain awareness of the latest issues. Together, OTT works with internal and external partners to enhance the nation's economic competitiveness and strengthen its leadership in innovation and transformative, impactful technologies that can help tackle the climate challenges of today.

Additional information about OTT's activities is described on OTT's website: <https://www.energy.gov/technologytransitions/office-technology-transitions>

Questions?
