

Opportunity Title: USFS Data Stewardship and Stakeholder Engagement Fellowship

Opportunity Reference Code: USDA-USFS-2022-0125

Organization U.S. Department of Agriculture (USDA)

Reference Code USDA-USFS-2022-0125

How to Apply *Connect with ORISE...on the GO!* Download the new ORISE GO mobile app in the [Apple App Store](#) or [Google Play Store](#) to help you stay engaged, connected, and informed during your ORISE experience and beyond!

A complete application package consists of:

- An application
- Transcript(s) – For this opportunity, an unofficial transcript or copy of the student academic records printed by the applicant or by academic advisors from internal institution systems may be submitted. Selected candidate must provide proof of completion of the degree before the appointment can start. All transcripts must be in English or include an official English translation. Click [Here](#) for detailed information about acceptable transcripts.
- A current resume/CV
- Two educational or professional recommendations. Applications need at least one recommendation submitted in order to be viewed by the mentor.

All documents must be in English or include an official English translation.

Application Deadline 4/19/2022 3:00:00 PM Eastern Time Zone

Description *Applications will be reviewed on a rolling-basis.

USFS Office/Lab and Location: A fellowship is available with the US Department of Agriculture (USDA) Forest Service, Pacific Northwest (PNW) Research Station located in Olympia, Washington.

At the heart of the U.S. Forest Service's mission is their purpose. Everything they do is intended to help sustain forests and grasslands for present and future generations. Why? Because their stewardship work supports nature in sustaining life. This is the purpose that drives the agency's mission and motivates their work across the agency. It's been there from the agency's very beginning, and it still drives them. To advance the mission and serve their purpose, the U.S. Forest Service balances the short and long-term needs of people and nature by: working in collaboration with communities and our partners; providing access to resources and experiences that promote economic, ecological, and social vitality; connecting people to the land and one another; and delivering world-class science, technology and land management.

Research Project: The Pacific Northwest Research Station has a fellowship opportunity focused on data stewardship and stakeholder engagement around assisted migration. The fellow will collaborate with an interdisciplinary team researching strategies to integrate assisted migration during reforestation activities. The team includes researchers in silviculture and genetics that are housed both within the PNW Research Station and the Pacific Southwest Research Station. In collaboration with the team, the Fellow will assist in the development and initiation of a new experimental network focused on evaluation of assisted population migration and the use of novel silvicultural practices to increase reforestation success. Opportunity Title: USFS Data Stewardship and Stakeholder Engagement

Fellowship

Opportunity Reference Code: USDA-USFS-2022-0125

network is planned to span a large geographic range from northern CA to southern AK and encompass all land ownerships. The research efforts of the Fellow is organized around three primary activities, which are: 1) coordinate and facilitate engagement with key stakeholders, and develop frameworks that will promote information sharing between managers and researchers, 2) develop databases and data visualization tools for use by researchers and land management organization partners, and 3) assist with field and lab measurements for ongoing experiments related to assisted migration and climate adaptation. The Fellow will also have an opportunity to develop or participate in new avenues of research or other interests related to natural resource management.

Learning Objectives:

- Understand and facilitate interactions at the intersection between science and land management. The Fellow will have a tremendous opportunity to engage with a large and diverse group of stakeholders including the USDA National Forest System, the Bureau of Land Management, state natural resource agencies, tribal entities, and forest industry.
- Learn about assisted migration and natural resource management issues in the Western United States while helping to develop networks and tools that will facilitate implementation of strategies to increase reforestation success and future climate resilience.
- Enhance collaborative skills as a member of a scientific team through development of questions, data collection, planning and organization, and implementation of experimental treatments.
- Gain first-hand knowledge of Forest Service Research & Development science and National Forest System management.
- Understand and facilitate interactions at the intersection between science and land management.

The Fellow will have the opportunity to interact with scientists in Forest Service research stations, and managers in the National Forest System and other land management agencies and entities. The Fellow may explore options for future job or educational opportunities and take advantage of additional training opportunities.

Mentor: The mentor for this opportunity is Robert Slesak (Robert.slesak@usda.gov). If you have questions about the nature of the research please contact the mentor.

Anticipated Appointment Start Date: May 2022. Start date is flexible and negotiable, and will depend on a variety of factors.

Appointment Length: The appointment will initially be for one year, but may be extended upon recommendation of USFS and is contingent on the availability of funds.

Level of Participation: The appointment is full-time.

Participant Stipend: The participant will receive a monthly stipend

commensurate with educational level and experience. **An annual stipend of \$60,416 will be provided. A health insurance allowance and a travel/training allowance will also be provided.**

Citizenship Requirements: This opportunity is available to U.S. citizens, Lawful Permanent Residents (LPR), and foreign nationals. Non-U.S. citizen applicants should refer to the [Guidelines for Non-U.S. Citizens Details page](#) of the program website for information about the valid immigration statuses that are acceptable for program participation.

ORISE Information: This program, administered by ORAU through its contract with the U.S. Department of Energy (DOE) to manage the Oak Ridge Institute for Science and Education (ORISE), was established through an interagency agreement between DOE and USFS. Participants do not become employees of USDA, USFS, DOE or the program administrator, and there are no employment-related benefits. Proof of health insurance is required for participation in this program. Health insurance can be obtained through ORISE.

Questions: Please visit our [Program Website](#). After reading, if you have additional questions about the application process please email USForestService@orise.orau.gov and include the reference code for this opportunity.

Qualifications The qualified candidate should have received a master's or doctoral degree in ecology, forestry, forest mensuration, natural resources or a related field, or be currently pursuing one of the degrees with completion by the end of May 2022. Degree must have been received within the past five years.

Preferred skills:

- Demonstrated ability to effectively communicate and work with diverse stakeholders
- Strong quantitative skills with experience in statistical analysis and proficiency in GIS
- Understanding of the principles and approaches to reforestation and forest management
- Ability to develop databases, data interfaces, and data integration tools (e.g, using R Shiny)
- Strong organizational skills and the ability to balance multiple projects simultaneously
- Capacity to work independently and prioritize activities to meet project schedules

Eligibility Requirements • **Degree:** Master's Degree or Doctoral Degree received within the last 60 months or anticipated to be received by 5/31/2022 11:59:00 PM.

- **Discipline(s):**
 - **Computer, Information, and Data Sciences** (2)
 - **Earth and Geosciences** (2)
 - **Environmental and Marine Sciences** (7)
 - **Life Health and Medical Sciences** (7)
