

Opportunity Title: Relationship between Coastal Water Quality and Wildland Fires in California

Opportunity Reference Code: 0199-NPP-NOV23-JPL-EarthSci

Organization National Aeronautics and Space Administration (NASA)

Reference Code 0199-NPP-NOV23-JPL-EarthSci

Application Deadline 11/1/2023 6:00:59 PM Eastern Time Zone

Description The area burned in California due to wildland fires is on an increasing trend over the last 4 decades, with 15 of the 20 largest wildfires occurring since 2000. California's population continues to increase as well, with many choosing to reside in coastal regions. Climate change projections indicate that California is expected to experience larger periods of extended and severe droughts, which can exacerbate wildland fire behavior, and also contribute to water supply insecurity with detrimental implications for anthropogenic uses as well as fresh and coastal ecosystems. This proposed research will focus on and evaluate the relationship between wildland fires extent and coastal water quality, and will leverage a suite of measurements from satellite to in-situ collections.

Opportunity Title: Relationship between Coastal Water Quality and Wildland
Fires in California

Opportunity Reference Code: 0199-NPP-NOV23-JPL-EarthSci

- U.S. Citizens;
- U.S. Lawful Permanent Residents (LPR);
- Foreign Nationals eligible for an Exchange Visitor J-1 visa status; and,
- Applicants for LPR, asylees, or refugees in the U.S. at the time of application with 1) a valid EAD card and 2) I-485 or I-589 forms in pending status

Eligibility Requirements

- **Degree:** Doctoral Degree.
