

**Opportunity Title:** Microwave to optics conversion  
**Opportunity Reference Code:** 0237-NPP-NOV23-JPL-TechDev

**Organization** National Aeronautics and Space Administration (NASA)

**Reference Code** 0237-NPP-NOV23-JPL-TechDev

**Application Deadline** 11/1/2023 6:00:59 PM Eastern Time Zone

**Description** High-efficiency conversion of microwave signals to the optical domain offers an advanced technique for the microwave signal coherent, frequency- and polarization-sensitive detection and processing with potentially unparalleled sensitivity and low noise. Our approach is based on using high quality factor, optically nonlinear whispering gallery resonators to facilitate such a conversion. While the future applications of this technique range from terahertz spectroscopy to building quantum computing networks, in the framework of our on-going project we focus on creating a prototype of a photonic receiver for ultra-compact W-band (94 GHz) radar designed for the Cubesat and Smallsat atmospheric studies.

We seek applicants with a background in this research field who can effectively demonstrate interest, competence, and original research ideas in developing and applying nonlinear microwave photonics.

**Applications with citizens from Designated Countries will not be accepted at this time, unless they are Legal Permanent Residents of the United States.** A complete list of Designated Countries can be found at: <https://www.nasa.gov/oior/export-control>.

Eligibility is currently open to:

- U.S. Citizens;
- U.S. Lawful Permanent Residents (LPR);
- Foreign Nationals eligible for an Exchange Visitor J-1 visa status; and,
- Applicants for LPR, asylees, or refugees in the U.S. at the time of application with 1) a valid EAD card and 2) I-485 or I-589 forms in pending status

**Eligibility  
Requirements**

- **Degree:** Doctoral Degree.
