

Opportunity Title: USFS Fellowship in Eastern United States Regional Synthesis of Mature and Old Growth Definitions and Characteristics

Opportunity Reference Code: USDA-USFS-NRS-2023-0467

Organization U.S. Department of Agriculture (USDA)

Reference Code USDA-USFS-NRS-2023-0467

How to Apply **Connect with ORISE...on the GO!** Download the new ORISE GO mobile app in the [Apple App Store](#) or [Google Play Store](#) to help you stay engaged, connected, and informed during your ORISE experience and beyond!

A complete application consists of:

- An application
- Transcript(s) – For this opportunity, an unofficial transcript or copy of the student academic records printed by the applicant or by academic advisors from internal institution systems may be submitted. Click [here](#) for detailed information about acceptable transcripts.
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- Two educational or professional recommendations

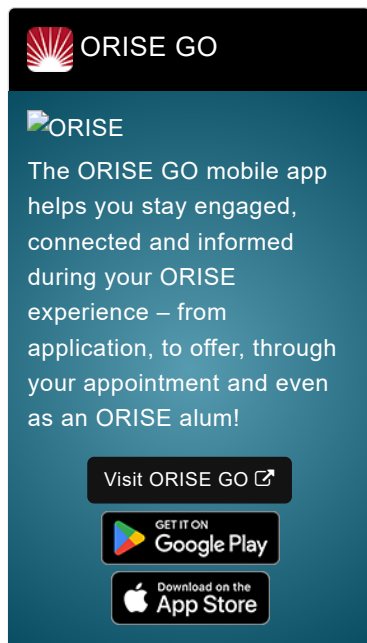

All documents must be in English or include an official English translation.

Description *Applications are reviewed on a rolling-basis.

ARS Office/Lab and Location: A research opportunity is currently available with the U.S. Forest Service Northern Research Station (USFS-NRS), located in Columbia, Missouri.

At the heart of the U.S. Forest Service's mission is their purpose. Everything they do is intended to help sustain forests and grasslands for present and future generations. Why? Because their stewardship work supports nature in sustaining life. This is the purpose that drives the agency's mission and motivates their work across the agency. It's been there from the agency's very beginning, and it still drives them. To advance the mission and serve their purpose, the U.S. Forest Service balances the short and long-term needs of people and nature by: working in collaboration with communities and our partners; providing access to resources and experiences that promote economic, ecological, and social vitality; connecting people to the land and one another; and delivering world-class science, technology and land management.

Research Project: The fellow will use previously produced regional documents as a foundation to modernize the synthesis of available literature with data sets from existing studies (e.g., tree-rings) and national inventory data to establish the state-of-knowledge on old growth forests in the USDA Forest Service Eastern Region. This will include quantitative summaries and minimum thresholds of old growth forest attributes by forest type and expanded to include attributes of mature forest systems, important for managing forests across varied social-ecological contexts into the future. From the synthesis, we will identify key parameters that define mature and old growth systems as well as assess the effectiveness of inventory and monitoring data to accurately capture these metrics across the appropriate spatial scales.

Opportunity Title: USFS Fellowship in Eastern United States Regional Synthesis of Mature and Old Growth Definitions and Characteristics

Opportunity Reference Code: USDA-USFS-NRS-2023-0467

Learning Objectives: The incumbent will have the opportunity to:

- Participate in synthesizing information detailing the structural characteristics of mature and old growth forests across forest types, land ownership, land-use history, and geographic region.
- Enhance collaborative skills by participating as a member of a multidisciplinary team of research scientists, land managers, and natural resource specialists from federal and state agencies, universities, and non-profit organizations.
- Strengthen their research, analysis, and writing skills in spatial analysis, science synthesis, and assessments of forest assets and conditions.
- Enhance their communication skills through participating in workshops and creating presentations for local and national conferences.

Mentor(s): The mentors for this opportunity are Christel Kern (christel.c.kern@usda.gov) and Jacob Fraser (jacob.fraser@usda.gov). If you have questions about the nature of the research, please contact the mentors.

Anticipated Appointment Start Date: 2024. Start date is flexible and will depend on a variety of factors.

Appointment Length: The appointment will initially be for two years, but may be renewed upon recommendation of USFS and is contingent on the availability of funds.

Level of Participation: The appointment is full time.

Participant Stipend: The participant will receive a monthly stipend commensurate with educational level and experience.

Citizenship Requirements: This opportunity is available to U.S. citizens and Lawful Permanent Residents (LPR) only.

ORISE Information: This program, administered by ORAU through its contract with the U.S. Department of Energy (DOE) to manage the Oak Ridge Institute for Science and Education (ORISE), was established through an interagency agreement between DOE and USFS. Participants do not become employees of USDA, USFS, DOE or the program administrator, and there are no employment-related benefits. Proof of health insurance is required for participation in this program. Health insurance can be obtained through ORISE.

Questions: Please visit our [Program Website](#). After reading, if you have additional questions about the application process, please email ORISE.USFS.NRS@ornl.gov and include the reference code for this opportunity.

Qualifications The qualified candidate will have earned or be pursuing a Doctoral degree in forestry, ecology, biology, geography or a related field at the time of starting the appointment. Degree must have been earned within the last five years or is anticipated to be received by June 1, 2024.

Opportunity Title: USFS Fellowship in Eastern United States Regional Synthesis of Mature and Old Growth Definitions and Characteristics

Opportunity Reference Code: USDA-USFS-NRS-2023-0467

Preferred Skills:

- Prior experience working with land management agencies,
- An aptitude for research, oral and written scientific communication, attention to detail, and ability to work independently and as a team.
- Strong statistical analyses skills, and publication record.

**Eligibility
Requirements**

- **Citizenship:** LPR or U.S. Citizen
- **Degree:** Doctoral Degree received within the last 60 months or anticipated to be received by 6/1/2024 11:59:00 PM.
- **Academic Level(s):** Graduate Students or Postdoctoral.
- **Discipline(s):**
 - **Chemistry and Materials Sciences** ([12](#) )
 - **Communications and Graphics Design** ([2](#) )
 - **Computer, Information, and Data Sciences** ([17](#) )
 - **Earth and Geosciences** ([21](#) )
 - **Engineering** ([27](#) )
 - **Environmental and Marine Sciences** ([14](#) )
 - **Life Health and Medical Sciences** ([51](#) )
 - **Mathematics and Statistics** ([11](#) )
 - **Physics** ([16](#) )
 - **Science & Engineering-related** ([2](#) )
 - **Social and Behavioral Sciences** ([29](#) )
