

Opportunity Title: National Energy Technology Laboratory Professional Internship Program (PIP)

Opportunity Reference Code: NETL-PIP

Organization National Energy Technology Laboratory (NETL)

Reference Code NETL-PIP

How to Apply **Application Deadline:** Applications to this opportunity are accepted throughout the year and are reviewed on a rolling basis.

A complete application consists of:

- An application, including academic history, work history experiences, and honors/awards
- Description of your goals, related experience, and related skills – refer to NETL's Core Competencies and ongoing projects when applicable
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume or CV
- Two educational or professional recommendations
You must provide contact information for at least two recommenders in your application. The first two recommendations received will be attached to your application for review by NETL. You may click the "send" (paper airplane) button to send the recommendation request email immediately after entering their information prior to submitting your application; if not, a request will automatically be sent when you submit your application. Your recommenders will receive an email with a subject line of "[Your Name] - ORISE Recommendation Request - [your email]", from Zintellect@orau.org. This email will include information on the opportunity to which you have applied, as well as a secure link to submit a recommendation for you for this application. If you ask the same person to submit a recommendation for you for multiple applications in Zintellect, they must click the unique link in each email request, but will be given the opportunity to copy over what they had previously submitted.

All documents must be in English or include an official English translation.

If you have questions about the application process, contact NETLinfo@orau.org.

Connecting with NETL's Core Competencies

The Professional Internship Program supports projects in all areas across the Lab. Most internship opportunities are in NETL's Research and Innovation Center, collaborating on energy-related research, but there are also opportunities within facility operations, project management, and other mission support functions. To learn more about ongoing projects, you may visit the [NETL website](#) and browse news, core competencies, and more. NETL's core competencies include five focus areas that address long-range issues central to environmentally sound and cost-effective energy usage. The sixth core competency – program execution and integration – emphasizes strategic collaborations, market and regulatory analysis, technology transfer, and more. Click through to learn more about each

area:

1. [Strategic Systems Analysis and Engineering](#)
2. [Energy Conversion Engineering](#)
3. [Computational Science and Engineering](#)
4. [Materials Engineering and Manufacturing](#)
5. [Geological and Environmental Systems](#)
6. [Program Execution and Integration](#)

To learn more about specific areas, you may conduct a literature search through a relevant search engine. Your institutional library or local public library may provide access to specific databases. The NETL corresponding author(s) can provide more information on ongoing projects; do let them know once you have applied in Zintellect.

After you have submitted an application in Zintellect, you may reach out to internship_program@netl.doe.gov to request to talk with the hosting researcher if you would like additional information on the project or to express particular interest. You must have a completed application in Zintellect to receive a response.

Description The National Energy Technology Laboratory's (NETL's) record of success has been built on understanding the future of energy and the technologies required to make that future possible. We've long touted our success in developing the technologies that took on acid rain in the 1970s and mercury in the early 2000s.

Program Goals

The Professional Internship Program is designed to introduce undergraduate students and recent Bachelor's graduates to the challenges of conducting energy research, and enable graduate students and recent Master's graduates to further build off their studies and experience as they join the scientific community. Participants interact daily with assigned mentors who guide research and project activities during the internship, while they become integral members of project teams.

The program goals include providing the opportunity to participants to:

- Develop skills and knowledge in their field of study
- Engage with new areas of basic and applied research
- Transition classroom theory into hands-on experience
- Network with world-class scientists
- Exchange ideas and skills with the Laboratory community
- Use state-of-the-art equipment
- Contribute to answers for today's pressing scientific questions
- Collaborate with the broader scientific and technical communities

Program Details

- **Mentored experience:** Selected applicants are matched with a mentor who provides active guidance throughout the appointment. Internship projects are designed to be hands-on; precise activities will vary based

Opportunity Title: National Energy Technology Laboratory Professional Internship

Program (PIP)

Opportunity Reference Code: NETL-PIP

on the offered project match. Under the guidance of their mentor, participants may be involved in the entire project cycle, potentially to include literature review, experimental design, proposal writing, implementation, data capture, documentation, data analysis, data visualization, reporting, manuscript writing, and other activities.

- **Program Dates:** Appointment start date and end date varies based on project needs and the selected applicant's availability. New selections are typically made 2-3+ months prior to the desired appointment start date.

- Students interested in fall internships are encouraged to apply by June 1st.
- Students interested in spring internships are encouraged to apply by October 1st.
- Students interested in summer internships are encouraged to apply by February 15th.

NETL also selects summer interns through agency programs including the [Mickey Leland Energy Fellowship](#), [EERE's Summer Internships](#), the NNSA's [Minority Educational Institution Student Partnership Program](#), and the [NSF's Mathematical Sciences Graduate Internship](#). Eligible applicants are encouraged to apply to all opportunities of interest. Application deadlines vary by opportunity.

PhD candidates interested in a collaborative thesis project may be eligible for [DOE's Office of Science Graduate Student Research Program](#).

- **Duration:** Appointment duration varies based on project needs and the selected applicant's availability. Summer appointments are typically 10-12 weeks. Initial appointment offers will be for a maximum of one year in length. Initial appointment offers for Post-Master's are for a maximum of two years in length.
 - Current student appointments are eligible for extensions as long as they remain eligible for the program (e.g., remain enrolled students with an overall GPA of 2.5/4.0 or higher).
 - Post-Bachelor's appointments are eligible for extensions up to 2 years.
 - Post-Master's appointments are eligible for extensions up to 3 years
- **Hours per week:** Expected participation varies by appointment based on project needs and the selected applicant's availability. Appointments may be offered on a part-time basis (typically around 16-20 hours per week) or full-time basis (up to 40 hours of training or research per week). Appointments during the fall and spring semesters are typically offered on a part-time basis for students enrolled in coursework.
- **Location:** NETL typically hosts interns at our [Pittsburgh, Pennsylvania](#); [Morgantown, West Virginia](#); and [Albany, Oregon](#) locations.
 - Some projects require on-site participation. On-site offers may include funds to help offset costs associated with travel to the hosting location.
 - Specific projects may support off-site / remote participation; the

Opportunity Title: National Energy Technology Laboratory Professional Internship

Program (PIP)

Opportunity Reference Code: NETL-PIP

hosting mentor could confirm. Some projects may only be able to offer remote participation if a faculty member from the student's home institution can support and collaborate on project activities.

- All selected applicants must receive approval and clearance from the U.S. Department of Energy prior to their appointment starting. This process requires a physical presence in the United States of America.
- **Stipend:** Participants receive a biweekly stipend based on their educational level. Stipend payments are taxable as an educational benefit. Stipends start at:
 - \$750.50-\$805 per week for undergraduate students
 - \$1167.50-\$1252.50 per week for recent Bachelor's graduates
 - \$1428-\$1532 per week for graduate students and recent Master's graduates
- **Inbound travel reimbursement:** On-site participants who must travel over 50 miles to the hosting NETL facility to begin their appointment may be eligible for inbound/outbound travel reimbursement. Details would be included in the appointment offer letter.
- **Housing:** Participants are responsible for identifying and making arrangements for housing prior to their appointment start date.
- **On-station travel:** In some cases, participants may be eligible for on-station travel to perform field visits, visit collaborator locations, present at or attend conferences or other technical meetings, and other appointment-related activities. Summer appointments typically do not include opportunities for on-station travel.
- **Deliverables:** To document the effectiveness of the program, participants are required to submit a pre-appointment and post-appointment survey, as well as a reflection on their appointment experience when they renew or end their appointment. The reflection should summarize their project(s), additional activities, and overall experience. Details are provided as the appointment end date approaches.

Participants may also have the opportunity to contribute to manuscripts, journal articles, book chapters, conference presentations, posters, patents, and other publications as a part of their appointment. Such achievements should also be reported to ORISE; additional details are provided after an offer has been accepted.

Qualifications No previous experience with research or technical projects is required to apply for this opportunity. Do describe any relevant experience you have in your application. Relevant skills that you may have from non-research experiences could include problem-solving, communication, teamwork, organizational skills, and more.

To be eligible for this opportunity, you must:

- Have one of the following academic statuses
 - An undergraduate student*¹ in good standing at a regionally

Opportunity Title: National Energy Technology Laboratory Professional Internship

Program (PIP)

Opportunity Reference Code: NETL-PIP

accredited college/university^{*2}

- A recent Bachelor's degree graduate^{*1} who has received their Bachelor's degree from a regionally accredited college/university^{*2} within the last 24 months at time of application
- A graduate student^{*3} in good standing at a regionally accredited college/university^{*2}
- A recent Master's degree graduate who has received their Master's degree from a regionally accredited college/university within the last 36 months at time of application
- Have an overall GPA of 2.5/4.0 or higher
- Be at least 18 years of age at the time of application
- Provide confirmation of coverage under a health insurance plan prior to the beginning of the internship

^{*1} Soon-to-be Associate's degree graduates are eligible to apply if enrolled as a student at time of application.

^{*2} Students and recent Bachelor's degree graduates from accredited Community Colleges and Technical Schools are encouraged to apply.

^{*3} Current doctoral students interested in a post-graduation opportunity and recent Doctoral degree graduates are invited to apply to [the Postdoctoral Research Fellowship Program](#).

Citizenship

This program does not have citizenship restrictions, although specific projects may have citizenship-based restrictions, depending on the sensitivity of the project. Demographic information, including citizenship information, that you provide in your application is not available to potential mentors reviewing applications. If a selected applicant is not a U.S. citizen, they must obtain and provide proof of a valid immigration status allowing us to pay them a stipend. More information may be found at the [Guidelines for Non-U.S. Citizens webpage](#). Once an offer has been made, the ORISE Immigration Services Office will reach out to the selected applicant with details about required immigration-status-related documents.

Selected applicants who are foreign nationals must also receive approval and clearance from the U.S. Department of Energy prior to their appointment starting. This process is initiated by NETL after an appointment offer has been accepted. This process may take more than seven weeks.

- **Age:** Must be 18 years of age

Affirmation I certify at the time of application that I meet at least one of the following academic status eligibility criteria, at a regionally accredited academic institution:

- I am currently pursuing an undergraduate degree.
- I received a Bachelor's degree no more than 24 months before the date of application.
- I am currently pursuing a master's degree.
- I received a Master's degree no more than 36 months before the date of application.
- I am currently pursuing a doctoral degree.
