

Opportunity Title: CDC Laboratory Molecular Biologist Fellowship: Molecular
Viral Surveillance

Opportunity Reference Code: CDC-NCEZID-DHCPP-2024-0015

Organization Centers for Disease Control and Prevention (CDC)

Reference Code CDC-NCEZID-DHCPP-2024-0015

How to Apply *Connect with ORISE...on the GO!* Download the new ORISE GO mobile app in the [Apple App Store](#) or [Google Play Store](#) to help you stay engaged, connected, and informed during your ORISE experience and beyond!

A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- One educational or professional recommendation. Your application will be considered incomplete, and will not be reviewed until one recommendation is submitted.

All documents must be in English or include an official English translation.

Application Deadline 5/3/2024 3:00:00 PM Eastern Time Zone

Description *Applications will be reviewed on a rolling-basis.

CDC Office and Location:

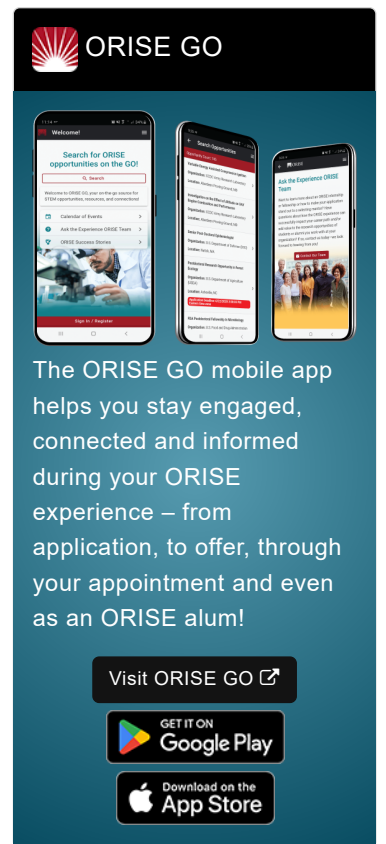

A public health laboratory training opportunity is available in the Chronic Viral Diseases Branch (CVDB) within the Division of High-Consequence Pathogens and Pathology (DHCPP) of the National Center for Emerging and Zoonotic Infectious Diseases (NCEZID) at the Centers for Disease Control and Prevention (CDC), located in **Atlanta, Georgia**.

CVDB's activities include laboratory-based method development and studies of human papillomavirus (HPV) infection, HPV vaccine effectiveness, and HPV-associated diseases to enable effective control and prevention. HPV is the most common sexually transmitted virus in the U.S and can cause some cancers, warts, and recurrent respiratory papillomatosis. The branch's HPV surveillance projects include the National Health and Nutrition Examination Survey ([NHANES](#)), Human Papillomavirus Vaccine Impact Monitoring Project ([HPV-IMPACT](#)), and supporting partners in other countries.

The Centers for Disease Control and Prevention (CDC) is one of the major operation components of the Department of Health and Human Services. CDC works to protect America from health, safety and security threats, both foreign and in the U.S. Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, CDC fights disease and supports communities and citizens to do the same.

Research Project: Specific activities may include:

- Cataloging, processing and storing biologic samples received in the HPV DNA laboratory while observing all safety guidelines
- Extracting nucleic acid from human specimens
- Detecting, quantifying and genotyping HPV by next-generation

Opportunity Title: CDC Laboratory Molecular Biologist Fellowship: Molecular
Viral Surveillance

Opportunity Reference Code: CDC-NCEZID-DHCPP-2024-0015

sequencing and other methods

- Recording and maintaining hardcopies and electronic copies of laboratory notebooks detailing experiments and results
- Managing records in electronic databases (e.g. Microsoft Access, SQL and laboratory information systems [LIMS])
- Analyzing data with Excel, Access, R, and SnapGene
- Drafting internal reports of tasks performed as they are requested
- Performing quality control and safety procedures necessary for the performance of laboratory protocols involved in working with biohazard materials
- Assisting in laboratory quality management activities as assigned
- Attending weekly departmental meetings that address current scientific activities of the branch.
- Participating in the CDC Fellows Professional Development Collective which offers periodic seminars, career mentorship, and networking with other fellows across the CDC
- Supplementing mentor-lead training with CDC trainings or external online courses to further develop new skills that support the team's goal and personal career path.

Learning Objectives: Under mentor guidance, the fellow will be trained in the application of next-generation sequencing and other molecular methods for reliable longitudinal surveillance of HPV to inform policy on effectiveness of vaccination and other public health practices. The training will include the life cycle of a sample from receipt through nucleic acid extraction, genotyping, and data management to archiving or destruction. The fellow will be involved in improving the efficiency and reliability of methods through automation and quality control checks in both wet-lab and bioinformatics processes. The fellow will develop several supporting skills applicable to a wide range of laboratory disciplines: teamwork, project management, written and oral communication, supply inventory management, laboratory safety, and quality management systems (<https://www.cdc.gov/labquality/qms-tools-and-resources.html>). This training will be supported further through a strong cohesive team of public health laboratory and data scientists.

Mentor(s): The mentor for this opportunity is Troy Querec (hep0@cdc.gov). If you have questions about the nature of the research please contact the mentor(s).

Anticipated Appointment Start Date: April 8 - June 3, 2024. Start date is flexible and will depend on a variety of factors.

Appointment Length: The appointment will initially be for one year, but may be renewed upon recommendation of CDC and is contingent on the availability of funds.

Level of Participation: The appointment is full time.

Participant Stipend: Stipend rates may vary based on numerous factors, including opportunity, location, education, and experience. If you are

interviewed, you can inquire about the exact stipend rate at that time and if selected, your appointment offer will include the monthly stipend rate.

Citizenship Requirements: This opportunity is available to U.S. citizens, Lawful Permanent Residents (LPR), and foreign nationals. Non-U.S. citizen applicants should refer to the [Guidelines for Non-U.S. Citizens Details page](#) of the program website for information about the valid immigration statuses that are acceptable for program participation.

ORISE Information: This program, administered by ORAU through its contract with the U.S. Department of Energy (DOE) to manage the Oak Ridge Institute for Science and Education (ORISE), was established through an interagency agreement between DOE and CDC. Participants do not become employees of CDC, DOE or the program administrator, and there are no employment-related benefits. Proof of health insurance is required for participation in this program. Health insurance can be obtained through ORISE.

The successful applicant(s) will be required to comply with Environmental, Safety and Health (ES&H) requirements of the hosting facility, including but not limited to, COVID-19 requirements (e.g. facial covering, physical distancing, testing, vaccination).

Questions: Please visit our [Program Website](#). After reading, if you have additional questions about the application process please email ORISE.CDC.NCEZID@orau.org and include the reference code for this opportunity.

Qualifications The qualified candidate should have received a bachelor's or master's degree in one of the relevant fields. Degree must have been received within the past five years.

Preferred skills:

- At least 2 years of post-baccalaureate laboratory experience.

Eligibility Requirements

- **Degree:** Bachelor's Degree or Master's Degree received within the last 60 month(s).
- **Discipline(s):**
 - **Life Health and Medical Sciences** ([51](#))

Affirmation I certify that I have not previously been employed by CDC or by a contractor working directly for CDC. I understand that CDC does not permit individuals with a prior employment relationship with CDC or its contractors to participate as trainees in the ORISE program. (Exceptions may be granted for individuals who, since the previous CDC employment, have obtained a new STEM degree which necessitates training in a new field.)
