

Opportunity Title: Analysis of Energy Markets and Environmental Regulation

Opportunity Reference Code: EPA-OP-NCEE-2016-02

Organization U.S. Environmental Protection Agency (EPA)

Reference Code EPA-OP-NCEE-2016-02

How to Apply A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- Two educational or professional references

All documents must be in English or include an official English translation.

If you have questions, send an email to EPArpp@orau.org. Please include the reference code for this opportunity in your email.

Description A postgraduate research training opportunity is currently available at the U.S. Environmental Protection Agency's (EPA) Office of Policy (OP) National Center for Environmental Economics (NCEE) in Washington, DC.

The participant will join NCEE staff economists in analyses and research efforts on regulatory design and benefit-cost analysis. The central focus of this research project is analysis of how energy markets respond to environmental regulation and affect the performance of those regulations.

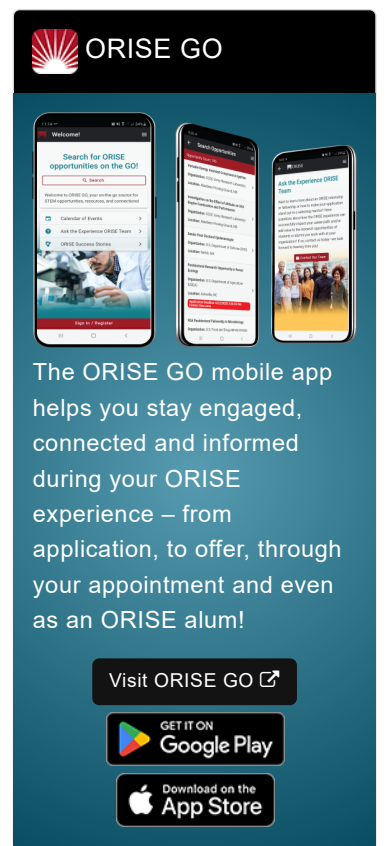

The participant may have the opportunity to be involved in the following activities:

- Investigating new developments in energy markets such as coal, natural gas, and oil that may influence the environmental impacts of those fuels domestically and abroad
- Using and potentially developing a detailed fuel or electricity market model to analyze key issues and scenarios as they relate to environmental regulation
- Linking an energy market model to a computable general equilibrium model (CGE) model to capture economy-wide effects.

The participant will engage in new and on-going efforts to improve analysts' ability to overcome key challenges when analyzing such effects.

This program, administered by ORAU through its contract with the U.S. Department of Energy to manage the Oak Ridge Institute for Science and Education, was established through an interagency agreement between DOE and EPA.

Qualifications Applicants must be currently enrolled in a doctoral program (dissertation stage) in economics, applied mathematics, environmental studies, or environmental/energy policy an accredited U.S. college or university, or have received a master's or doctoral degree in economics within five years of the starting date. Doctoral students will be required to show proof of enrollment each semester.

Opportunity Title: Analysis of Energy Markets and Environmental Regulation

Opportunity Reference Code: EPA-OP-NCEE-2016-02

Knowledge in conducting and supporting energy market analysis, electricity/energy sector modeling, representing environmental or energy policy in that type of framework, and potentially modifying an electricity/energy model to incorporate additional detail is desired. Familiarity with how to link these types of models to CGE models is helpful.

The appointment is full-time for one year and may be renewed upon recommendation of EPA and contingent on the availability of funds. The participant will receive a monthly stipend. Funding may be made available to reimburse the participant's travel expenses to present the results of his/her research at scientific conferences. No funding will be made available to cover travel costs for pre-appointment visits, relocation costs, tuition and fees, or a participant's health insurance. The participant must show proof of health and medical insurance. The participant does not become an EPA employee.

The mentor for this project is David A. Evans (evans.davida@epa.gov).

- Eligibility Requirements**
- **Citizenship:** LPR or U.S. Citizen
 - **Degree:** Master's Degree or Doctoral Degree received within the last 60 month(s).
 - **Discipline(s):**
 - **Mathematics and Statistics** ([1](#) )
 - **Social and Behavioral Sciences** ([1](#) )
