

Opportunity Title: CDC Public Health Administration and Implementation

Fellowship

Opportunity Reference Code: CDC-NCIPC-2024-0048

Organization Centers for Disease Control and Prevention (CDC)

Reference Code CDC-NCIPC-2024-0048

How to Apply *Connect with ORISE...on the GO!* Download the new ORISE GO mobile app in the [Apple App Store](#) or [Google Play Store](#) to help you stay engaged, connected, and informed during your ORISE experience and beyond!

A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- One educational or professional recommendation. Your application will be considered incomplete, and will not be reviewed until one recommendation is submitted.

All documents must be in English or include an official English translation.

Description *Applications will be reviewed on a rolling-basis.

CDC Office and Location: One research opportunity is currently available with the Division of Overdose Prevention (DOP), within the National Center for Injury Prevention and Control (NCIPC), at the Centers for Disease Control and Prevention (CDC) in Atlanta, Georgia.

The Centers for Disease Control and Prevention (CDC) is one of the major operation components of the Department of Health and Human Services. CDC works to protect America from health, safety and security threats, both foreign and in the U.S. Whether diseases start at home or abroad, are chronic or acute, curable or preventable, human error or deliberate attack, CDC fights disease and supports communities and citizens to do the same.

CDC's DOP leads injury prevention efforts by using science and data to understand drug overdoses and their related harms, and to develop evidence-based prevention solutions that work. Our mission is to save lives, prevent suffering, and help reduce healthcare costs. The Division's priority is to monitor, prevent, and reduce harms associated with drug use, misuse, and overdose.

Research Project: Joining DOP, the selected participant will train in the Applied Prevention Sciences Team. As part of our efforts to support the mission and goals of CDC's opioid overdose and broader drug overdose prevention work, we identify, scale up and evaluate evidence-based overdose prevention and response strategies, provide technical assistance to localities funded to conduct overdose prevention activities and develop and disseminate scientific products. This Public Health Administration and Implementation Science Fellowship will be an excellent opportunity for selected participants interested in acquiring training and experience in the domain of science in service of program implementation.

The training activities will align with the prevention activities described under the Overdose Data to Action: Limiting Overdose through

Collaborative Actions in Localities (OD2A: LOCAL) cooperative agreement and the overall goals and objectives of DOP. Under the guidance of a mentor, the participant's training activities will be in developing systems and infrastructure to support science and evaluation programs and using research findings to develop action-oriented program recommendations and support the development of resources to support overdose prevention. This will be a rich learning experience for understanding standard epidemiology and prevention and implementation science more broadly. Our program is committed to ensuring that all programmatic research is informed by the best available science, and that we leverage programmatic insight to shape future scientific agendas.

Learning Objectives: Under the guidance of a mentor, the participant will be involved in the following activities:

- Train to engage directly funded partners to offer scientific technical assistance (under a health scientist mentorship- CDC FTE) for Opioid Prevention
- Intensive training experience on the intersection of science and program
- Help support the development of Scientific and Programmatic Products
- Train in the development of a host of scientific products that reflect programmatic insight and experience
- Train in the development of programmatic resources and reports, peer-reviewed publications, and internal scientific support products.

Mentor(s): The mentor for this opportunity is Alice Asher (luq1@cdc.gov). If you have questions about the nature of the research please contact the mentor(s).

Anticipated Appointment Start Date: 2024. Start date is flexible and will depend on a variety of factors.

Appointment Length: The appointment will initially be for one year, but may be renewed upon recommendation of CDC and is contingent on the availability of funds.

Level of Participation: The appointment is full time.

Participant Stipend: Stipend rates may vary based on numerous factors, including opportunity, location, education, and experience. If you are interviewed, you can inquire about the exact stipend rate at that time and if selected, your appointment offer will include the monthly stipend rate.

Citizenship Requirements: This opportunity is available to U.S. citizens only.

ORISE Information: This program, administered by ORAU through its contract with the U.S. Department of Energy (DOE) to manage the Oak Ridge Institute for Science and Education (ORISE), was established through an interagency agreement between DOE and CDC. Participants do not become employees of CDC, DOE or the program administrator, and there are no employment-related benefits. Proof of health insurance is

required for participation in this program. Health insurance can be obtained through ORISE.

The successful applicant(s) will be required to comply with Environmental, Safety and Health (ES&H) requirements of the hosting facility, including but not limited to, COVID-19 requirements (e.g. facial covering, physical distancing, testing, vaccination).

Questions: Please visit our [Program Website](#). After reading, if you have additional questions about the application process please email ORISE.CDC.NCIPC@orau.org and include the reference code for this opportunity.

Qualifications The qualified candidate should have received a master's or doctoral degree in one of the relevant fields or be currently pursuing one of the degrees and will reach completion by August 31, 2024. Degree must have been received within five years of the appointment start date.

Preferred skills:

- Experience or knowledge regarding public health, program administration, epidemiology, drug overdose and prevention or a related area
- Experience or knowledge related to public policy research
- A track record of scientific productivity exemplified by scientific publications and other evidence of effective written communication skills
- Ability to collaborate with other scientific and professional staff on surveillance and evaluation activities.

Eligibility Requirements

- **Citizenship:** U.S. Citizen Only
- **Degree:** Master's Degree or Doctoral Degree received within the last 60 months or anticipated to be received by 8/31/2024 12:00:00 AM.
- **Academic Level(s):** Post-Bachelor's or Post-Master's.
- **Discipline(s):**
 - **Life Health and Medical Sciences** ([5](#) )
 - **Other Non-Science & Engineering** ([5](#) )
 - **Social and Behavioral Sciences** ([8](#) )

Affirmation I certify that I have not previously been employed by CDC or by a contractor working directly for CDC. I understand that CDC does not permit individuals with a prior employment relationship with CDC or its contractors to participate as trainees in the ORISE program. (Exceptions may be granted for individuals who, since the previous CDC employment, have obtained a new STEM degree which necessitates training in a new field.)
