

Opportunity Title: Technology Transfer Fellowship Program

Opportunity Reference Code: NIH-NIAID-2019-0003

Organization National Institutes of Health (NIH)

Reference Code NIH-NIAID-2019-0003

How to Apply A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- Two educational or professional references

All documents must be in English or include an official English translation.

If you have questions, send an email to NIHprograms@oraui.org. Please include the reference code for this opportunity in your email.

Description The National Institute of Allergy and Infectious Diseases (NIAID) Technology Transfer Fellowship Program in the Technology Transfer and Intellectual Property Office (TTIPO) provides an opportunity to learn about the policies and laws that drive technology transfer at NIH and develop the skills for a career in technology transfer. TTIPO has primary responsibility for the technology transfer function of NIAID. This includes negotiating agreements to enable NIAID access to research resources (e.g., through material or information exchange and collaboration), protecting the government's rights in new inventions through patenting, and negotiating licenses to advance development and commercialization of NIAID discoveries. Currently, NIAID is also providing patenting and licensing service to the Centers for Disease Control and Prevention (CDC).

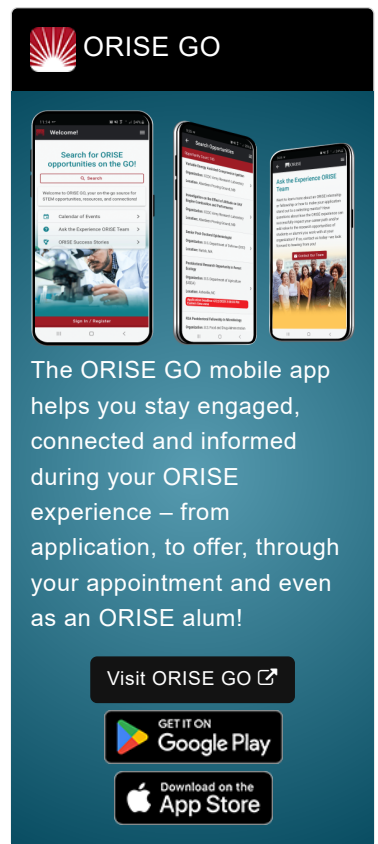

Under the guidance of a mentor, NIAID Technology Transfer Fellows will be trained in activities such as:

- negotiating Confidential Disclosure Agreements, Material Transfer Agreements, Clinical Trial Agreements, Cooperative Research and Development Agreements (CRADAs) and other technology transfer agreements for NIAID;
- reviewing new inventions reported by NIAID or CDC scientists for potential patenting or licensing;
- analyzing a NIAID or CDC patent portfolio and making recommendations on portfolio management;
- reviewing licenses to NIAID or CDC patents or proprietary materials and negotiating license terms in partnership with a federal employee;
- analyzing NIAID or CDC patent portfolios to identify marketing opportunities and strategies; and
- other activities related to technology transfer and intellectual property.

This program, administered by ORAU through its contract with the U.S. Department of Energy (DOE) to manage the Oak Ridge Institute for Science and Education (ORISE) was established through an interagency agreement between DOE and the National Institute of Allergy and Infectious Diseases (NIAID). The initial appointment is for one year, but may be renewed upon recommendation of NIAID contingent on the availability of funds. The participant will receive a monthly stipend commensurate with educational level and experience. Proof of health insurance is required for participation in this program. The appointment is full-time at NIAID in the Rockville, MD, area. Participants do not become employees of NIH, NIAID, DOE or the program administrator, and there are no employment-related benefits.
