

Opportunity Title: CDC Public Health Research Fellowship

Opportunity Reference Code: CDC-OD-2020-0185

Organization Centers for Disease Control and Prevention (CDC)

Reference Code CDC-OD-2020-0185

How to Apply *Connect with ORISE...on the GO!* Download the new ORISE GO mobile app in the [Apple App Store](#) or [Google Play Store](#) to help you stay engaged, connected, and informed during your ORISE experience and beyond!

A complete application consists of:

- An application
- Transcripts – [Click here for detailed information about acceptable transcripts](#)
- A current resume/CV, including academic history, employment history, relevant experiences, and publication list
- One educational or professional recommendation. Your application will be considered incomplete, and will not be reviewed until one recommendation is submitted.

All documents must be in English or include an official English translation.

If you have questions, send an email to ORISE.CDC.OD@orau.org. Please include the reference code for this opportunity in your email.

Application Deadline 9/1/2020 3:00:00 PM Eastern Time Zone

Description *Applications will be reviewed on a rolling-basis.

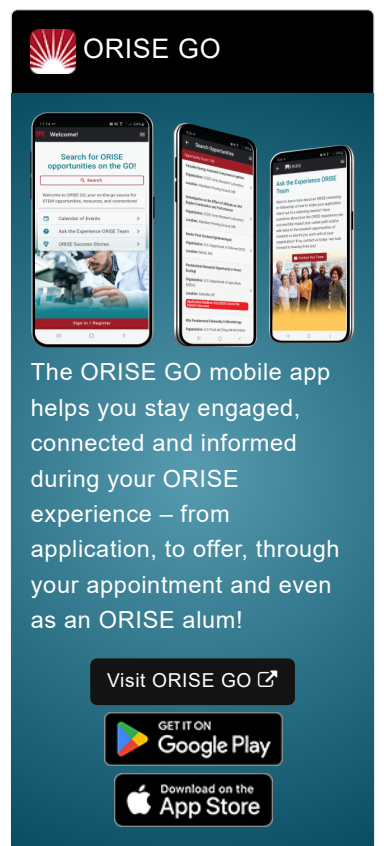

A fellowship opportunity is currently available in the Policy Research, Analysis, and Development Office (PRADO), within the Office of the Associate Director for Policy & Strategy at the Centers for Disease Control and Prevention. PRADO's mission is to conduct policy research and analysis and to inform evidence-based strategies to improve population health. PRADO assesses, develops, and translates evidence showing the health and economic impact of policy through analyses of high priority interventions to inform decision makers and public health practitioners.

This project will provide an excellent training opportunity for the selected participant to gain experience conducting statistical analyses on a broad range of public health topics using data from the American College Health Association (ACHA)'s Connected College Health Network (CCHN), a data warehouse designed to enable data-driven decision-making that results in the improved health of college students nationwide. CCHN connects several existing projects, including the ACHA-National College Health Assessment, College Health Surveillance Network, Healthy Campus 2020, the Integrated Postsecondary Education Data System, and ACHA Institutional Profile Survey. (https://www.acha.org/ACHA/Programs_and_Services/Connected_College_Health_Network.aspx).

Under the guidance of the PRADO mentor, CDC disease subject matter experts, and ACHA data specialists, the participant will be involved in these additional learning opportunities:

- Designing project proposal and data analysis plan
- Creating, updating, analyzing and managing large data sets
- Contributing to the analysis of data from CCHN
- Preparing statistical and analytic reports and presentations
- Developing and strengthening research and synthesis skills

This program, administered by ORAU through its contract with the U.S. Department of Energy to manage the Oak Ridge Institute for Science and Education, was established through an interagency agreement between DOE and CDC. The initial appointment can be up to one year, but
